

PABLO LÓPEZ RODRÍGUEZ

DATA ANALYST · AI & DATA SCIENTIST — SQL · ETL · DATA WAREHOUSING · BI

PROFILE

Data Analyst / Data Scientist with 6+ years turning raw operational data into reliable datasets, data-quality models and management reporting. Hands-on with **SQL**, large-scale **ETL** (Spark, AWS Glue), cloud **data warehousing** (Snowflake, S3/Athena) and **BI dashboards** (Power BI, Plotly Dash). Experience in the **defence sector** (Airbus Defence & Space) and with **ITSM / incident data** (Fujitsu). EU citizen, B2B contractor, open to relocation to Belgium/Netherlands and to security clearance.

CORE COMPETENCIES

Data Analysis

SQL

Data Warehousing

ETL Pipelines

BI / Reporting

Data Quality & Governance

ITSM / Ticketing Data

Defence Sector

AWS

Snowflake

Power BI

EXPERIENCE

Freelance — Grupo Optimus · Endesa · Coca-Cola

Jun 2025 – present

AI & Data Scientist (B2B contractor)

- Grupo Optimus (energy):** ETL of energy-consumption data (SIPS/CUPS) into a PostgreSQL warehouse; CRM analytics and automated reporting (invoices → Excel); AI models for invoice extraction and solar-roof detection; KPI dashboards for sales teams.
- Endesa:** SQL analysis of customer and consumption datasets, data-quality checks and BI reporting for commercial operations.
- Coca-Cola:** Data-science support for sales and demand analytics — forecasting models, segmentation and Power BI dashboards.
- Deep-Check (own product):** AI identity-verification SaaS; data pipelines, AUC/EER benchmarks on 900K+ samples; paper published (Zenodo DOI).

Santander Consumer Finance / Openbank — via NFAQ

Dec 2024 – May 2025

Data Engineer — Data Governance & Data Quality

- Python/SQL data-analysis tooling for the Data Quality team; defined a data-quality model ensuring consistency and accuracy across reporting pipelines.
- Designed and ran **Spark ETL** processes for large-scale transformation and loading into **Snowflake** (cloud data warehouse); quality KPIs and reports for governance stakeholders; CI/CD with Jenkins, Hadoop.

Elmya

Mar 2024 – Oct 2024

Head of Development — Data & Automation

- Led the technical area; earthworks optimisation model with Scala/PySpark ETL and interactive **Plotly Dash** dashboards for engineering decisions; QR document-control system with hashed, auditable records.

Airbus Defence & Space — via Accenture

Jan 2023 – Mar 2024

Big Data Engineer / Data Analyst — Military & Defence division

- Data extraction, cleansing and analysis for an internal defence **inventory programme**; delivered analytical datasets and reports to programme management.
- Implemented **AWS S3, Glue and Athena** for distributed ingestion and large-scale SQL querying over the data lake.
- ETL in **Scala/PySpark**; reporting with Seaborn and Plotly Dash; GitHub, Hadoop.

Fujitsu

Sep 2022 – Jan 2023

Data Engineer & Incident / ITSM Analyst

- Database administrator and developer of the internal **ticketing (ITSM) platform** (MySQL, Java, JavaScript); analysed incident and service-request data for operational reporting.
- Monitoring/alerting tools in Python and Bash for incident detection and SLA tracking; Snowflake + AWS S3/Lambda integration.

EDUCATION & CERTIFICATIONS

Software Engineering

2024

Google IT Support

Professional

2022 · Certificate

Ticketing & Monitoring (ITSM)

Internal training · Fujitsu

Python · Java · Spark · JavaScript

Certified courses · English B2 (Cambridge)

CONTACT

Seville, Spain
Open to relocation (BE / NL)
